

Complete Lesson Transcript – Lesson 247 [English]

Kirin: Chinese Learn Online lesson 247 .

Hello everyone , I am Teacher Yang .

Raphael: Hello everyone , I am Teacher Lai .

Adam: And hello, I'm Adam.

Kirin: Welcome to our learning Chinese course .

Raphael: In the article from our last lesson , we taught you many new words .

Kirin: That's right . But how are our students supposed to remember all these new words ?

Raphael: Very good question . On our website , there are more examples to help them remember the new words that we have taught . As well, in today's lesson , we will also listen to an article that will review the words taught in our last lesson .

Kirin: So what is the topic of today's article ?

Raphael: Video game consoles .

Adam: Literally, that's "television game machine", and refers to video game consoles.

Kirin: Video game consoles .

Raphael: Ok, let's first listen to today's article at a normal speed .

Kirin: In the past, when people were young , they would normally go out with their friends to play , such as playing baseball , riding bicycles etc . This way not only could they have fun , but they could also get some exercise . But nowadays, these traditional activities seem to be slowly disappearing . Due to the growth of video game machines , many children choose to stay at home , and play in front of the television all day . So nowadays, more and more parents , are beginning to worry that video game consoles are having a bad influence on their kids . For example, spending a long time watching television is very bad for the eyes , as well by sitting all day in the same place , the chances of getting to know others is reduced considerably . These all influence the development and health of children . So what can be done to change this ? Due to the emergence of this problem , a smart company , put out the latest model of their video game machine . As you play , our body also requires to perform some movement . This way,

not only can you play games , you can also do some exercise , and compete with friends . In the future , perhaps kids won't have to go outside , they can just stay at home and play these kinds of games , which may result in their bodies becoming healthier .

Raphael: Let's listen again to this article at a slowed down speed .

Kirin: In the past, when people were young , they would normally go out with their friends to play , such as playing baseball , riding bicycles etc . This way no only could they have fun , but they could also get some exercise . But nowadays, these traditional activities seem to be slowly disappearing . Due to the growth of video game machines , many children choose to stay at home , and play in front of the television all day . So nowadays, more and more parents , are beginning to worry that video game consoles are having a bad influence on their kids . For example, spending a long time watching television is very bad for the eyes , as well by sitting all day in the same place , the chances of getting to know others is reduced considerably . These all influence the development and health of children . So what can be done to change this ? Due to the emergence of this problem , a smart company , put out the latest model of their video game machine . As you play , our body also requires to perform some movement . This way, not only can you play games , you can also do some exercise , and compete with friends .
