Raphael: Ok, let's first listen to today's article at a normal speed .

Kirin: In the past few years, due to the speed of the internet becoming faster , many websites have emerged that let users download free pirated software , music, movies, video games and books etc . Whatever things you want , as long as you can find them , most can be downloaded . The people who download these things to their computer feel that this is very convenient . Since now they don't have to go out the door to buy things . They just have to sit in front of a computer , and download whatever things they want . In the past, the behaviour of these people , made many Hollywood and music companies very angry , since the content they had published was being stolen . Later, Hollywood slowly began to change the way they sold movies . Now, other than buying legal CDs , you can also go to legal websites and download original music and movies . Their quality is all very good . It is believed that in the future , if the speed of the internet becomes faster , we might find other ways , to use the advantages of the internet to make our life more convenient .
