

Complete Lesson Transcript – Lesson 350 [English]

Kirin: Chinese Learn Online lesson 350 .

Hello everyone , I am Teacher Yang .

Raphael: Hello everyone , I am Teacher Lai .

Adam: And hello, I'm Adam.

Kirin: Welcome to our learning Chinese course .

Raphael: In today's lesson , we are going to teach you about geography .

Kirin: Didn't we already teach about geography before ?

Raphael: Correct . But geography is a big subject , so we still have a lot of content that we haven't taught yet . Let's begin today's topic now . What's the name of the place we live in ?

Kirin: Taiwan .

Raphael: Not the name of our country . What I asked was what the name of the place our whole world lives in ?

Kirin: Earth .

Adam: Literally that's "earth ball" and refers to the planet "earth."

Raphael: On our earth there are many countries . Now these countries are all in 7 parts of the earth . What do we call these places ?

Kirin: Continent .

Adam: Continent.

Raphael: Actually in the past we have already taught the names of some continents .

Kirin: Australia , Asia .

Raphael: But we still have five other continents .

Kirin: North America .

Adam: Literally, that's "North American continent."

Raphael: So if you know North America , then you probably also know what the continent to the south of North America is called .

Kirin: South America .

Adam: South America.

Raphael: Ok, now what continent is next to Asia ?

Kirin: Europe .

Adam: Europe.

Raphael: And what continent is south of Europe ?

Kirin: Africa .

Adam: Africa.

Raphael: The last continent is at the southern most part of the earth . It's a very cold place , So there aren't many people who live there .

Kirin: Antarctica .

Adam: Literally, that's "south pole continent," or "Antarctica."

Kirin: Wow, today we have taught you many place nouns .

Raphael: That's right . But if you already know the names of some continents , then you can probably quickly remember what we've taught you . The two continents that are easy to mix up are Australia and Europe .

Kirin: So you have to listen carefully . So what can we do with the names of these continents ?

Raphael: Right now I will think of the names of some countries , and then tell you where in the earth they are located . This way you can look for the country there , then have to tell me your answer .

Kirin: But I'm not very good at geography , so what to do ?

Raphael: Then it would be best if you found a world map to help you .

Kirin: Ok . This way our students can practice their listening skills , while learning the names of some new countries .

Raphael: That's right . Now the first country is in North America , and is south of America .

Kirin: Mexico .

Adam: Mexico.

Raphael: The second is the southern most country in Africa .

Kirin: South Africa .

Adam: South Africa.

Raphael: Ok, the third is the biggest country in South America .

Kirin: Brazil .

Adam: Brazil.

Raphael: Ok, the fourth is in Europe , and is north of Spain .

Kirin: France .

Adam: France.

Raphael: The last country is in Asia , and is south west of Japan .

Kirin: Korea .

Adam: Korea.

Raphael: Very good . We hope that today's lesson was helpful to you . Our premium subscribers can visit our website [chineselearnonline-com](http://chineselearnonline.com) for more practice .

Kirin: See you next time .
